

MIG Engineering Ltd. Wins Business of the Year Award

MIG Engineering Ltd., based in Sarnia Ontario at the mouth of the St. Clair River opposite Port Huron, Michigan, has been awarded the Business of the Year by the Sarnia Lambton Chamber of Commerce. This 1000 company member Chamber is a national and provincial award winning, highly respected Chamber of Commerce.

MIG had celebrated its 50th Anniversary in 2009. Upon receiving the award MIG President Marty Raaymakers stated “this is the icing on the cake following our hugely successful 50th Anniversary. In 2009, 21 of MIG’s top 30 clients were clients continuously for 20 years... some of those for the entire 50 years. I think that sums up what MIG is all about”.

The firm of 25 full time and contract staff provides multi-discipline engineering and project management for the municipal, senior government, industrial and private sectors.

In 2006 MIG was awarded an Award of Excellence by the Consulting Engineers of Ontario for 11 day engineering and construction management of an emergency 8 km hydrogen pipeline required in Sarnia when Air Products and Chemicals (US) lost production of its hydrogen facility in New Orleans after Hurricane Katrina.

MIG is launching its new website migeng.com, June 1, 2010.
