

FOR IMMEDIATE RELEASE

Quebec teams honoured during Canadian Consulting Engineering (CCE) Awards Virtual Celebration

(OTTAWA) October 28, 2021 – The work of Canadian consulting engineering firms was celebrated online Thursday night, as twenty projects were recognized for excellence during the 2021 Canadian Consulting Engineering (CCE) Awards virtual celebration. The **Quebec** offices of *AECOM /Tetra Tech* and *Englobe Corp.* each received an **Award of Excellence** for their projects.

Recognized as the industry's highest honours, the awards are presented to projects by Canadian firms that illustrate the most remarkable engineering feats. “These awards showcase incredible projects and accomplishments by consulting engineering firms across Canada,” said ACEC President and CEO John Gamble. “They demonstrate how ACEC members use ingenuity and innovation to connect communities, grow the economy, and improve safety and sustainability. The impacts and benefits of their work are long-lasting, often immeasurable, and deserve to be celebrated.”

Turcot Interchange and Railways Reconstruction Project

As part of an integrated team with the Quebec Ministry of Transport, a consortium formed by AECOM and Tetra Tech acted as the owner’s engineer for the Turcot interchange project over the last twelve years. This complex project included the reconstruction of interchanges, sections of motorways, railways and municipal links. A combination of alternative and traditional delivery methods made the implementation and integration of this project possible within an urban setting, while maintaining the busiest road sector in Canada active.

“AECOM and Tetra Tech are proud to have contributed for more than a decade, as an integrated team with the Quebec Ministry of Transport, to the complete reconfiguration of this strategic interchange, which is among the busiest in Canada, and whose improvements in terms of functionality, safety and urban integration will benefit future generations,” said François Labelle, P.Eng., Director of AECOM-Tetra Tech Consortium.

Major Environmental Remediation Project in Chisasibi, Quebec

Hydro-Quebec retained Englobe in 2015 to manage the major environmental remediation project of Block D, a parcel of land located on the eastern shore of James Bay in the Cree community of Chisasibi. The team overcame local challenges by developing relationships with stakeholders and working closely with the people of the community, who represented 85% of the workforce. Englobe met all the objectives, which allowed the concerned stakeholders to initiate the process of returning this parcel of land to the Cree Nation of Chisasibi.

“It is a tremendous honour for Englobe to receive this important award. This significant environmental rehabilitation project would not have been possible without the support of Hydro-Quebec, but especially that of all the members of the community of Chisasibi, who have been remarkably collaborative and involved throughout the project,” said Mike Cormier, B.Eng., Co-President of Englobe Corp.

About AECOM and Tetra Tech

AECOM is the world's trusted infrastructure consulting firm, delivering professional services throughout the project lifecycle. On projects spanning transportation, buildings, water, new energy and the environment, our clients trust us to solve their most complex challenges. Tetra Tech is a leading, global provider of consulting and engineering services with 20,000+ experts worldwide, delivering clear solutions to complex problems.

About Englobe Corp.

Englobe Corporation is a Canadian leader in environment, geosciences, and materials engineering. Operating in 64 Canadian locations and 5 locations in the UK and France, Englobe's team of 2,600 resources includes engineers, professionals, technicians, and technical support staff. For more than 60 years, the company has conducted investigations, inspection, testing, analyses, assessments, supervision and monitoring of work for its clients.

Learn about all CCE Award winning projects

In November, follow ACEC's national and international award winning *#20DaysOfExcellence in Engineering* campaign on social media. Visit www.acec.ca/awards/2021 to view videos of the winning projects and to learn more about the impact of consulting engineering on our quality of life.

About CCE Awards co-sponsors

ACEC represents companies in Canada that provide professional engineering services to both public and private sector clients. These services include the planning, design and execution of all types of engineering projects, as well as providing independent advice and expertise in a wide range of engineering and engineering-related fields. For more information about ACEC and the 2021 Canadian Consulting Engineering Awards, please visit www.acec.ca.

Canadian Consulting Engineer is a privately-owned magazine for professional engineers working as consultants in the construction field. It is published by Annex Business Media. This year's award-winning projects are described in full in the September/October 2021 issue of *Canadian Consulting Engineer* at www.canadianconsultingengineer.com/digital-edition/.
