

**FOR IMMEDIATE RELEASE**

## **Stantec honoured during Canadian Consulting Engineering (CCE) Awards Virtual Celebration**

**(OTTAWA) October 28, 2021** – The work of Canadian consulting engineering firms was celebrated online Thursday night, as twenty projects were recognized for excellence during the 2021 Canadian Consulting Engineering (CCE) Awards virtual celebration. **Stantec** received two **Awards of Excellence** for the *Peter Lougheed Centre Temporary Covid-19 Treatment Facility* project located in Calgary, Alberta and the *Capital Regional District Wastewater Treatment* project located in the Greater Victoria Area, British Columbia.

Recognized as the industry's highest honours, the awards are presented to projects by Canadian firms that illustrate the most remarkable engineering feats. “These awards showcase incredible projects and accomplishments by consulting engineering firms across Canada,” said ACEC President and CEO John Gamble. “They demonstrate how ACEC members use ingenuity and innovation to connect communities, grow the economy, and improve safety and sustainability. The impacts and benefits of their work are long-lasting, often immeasurable, and deserve to be celebrated.”

### **Peter Lougheed Centre Temporary Covid-19 Treatment Facility**

In March 2020, Stantec Consulting Ltd., along with Alberta Health Services, Sprung Structures, Faulkbuilt, and CANA Construction collaborated to build a temporary treatment facility to accommodate the predicted Pandemic peak in May 2020. At the time, Calgary accounted for 63% of Alberta’s confirmed cases of Covid-19. Communication and coordination between all disciplines, physicians, and nurses was critical. The facility was designed and entirely constructed under 3 weeks, providing an additional 70 treatment spaces for patients in Calgary.

"It was an honour to work on this important project and be part of helping the province take action against the Covid-19 pandemic" said Jeff Rent, P.Eng., Principal, Mechanical Engineer at Stantec.

## **Capital Regional District Wastewater Treatment**

When the Capital Regional District (CRD) embarked on an ambitious effort to plan, construct and commission a new 108 mega litre per day tertiary treatment facility to serve the Core Area communities of Greater Victoria, Stantec was engaged to provide technical services and act as the Owner’s Engineer. Collaborating with the CRD team to deliver nine major capital projects under the program – the largest in CRD history – Stantec developed innovative solutions and used a hybrid procurement model, completing construction in record time of only 4 years and with cost savings of \$425 million.

“It was a pleasure to collaborate with CRD on this challenging project demonstrating CRD’s commitment to environmental stewardship. As part of an integrated team, Stantec delivered the project on time and budget,” said Reno Fiorante, P.Eng., PE, Senior Vice-President, Water at Stantec. “The new tertiary treatment and residuals treatment facilities will serve the Greater Victoria communities for many years to come.”

### **About Stantec**

Communities are fundamental. Whether around the corner or across the globe, they provide a foundation, a sense of place and of belonging. That’s why at Stantec, we always design with community in mind. We care about the communities we serve—because they’re our communities too. We’re designers, engineers, scientists, and project managers, innovating together at the intersection of community, creativity, and client relationships. Balancing these priorities results in projects that advance the quality of life in communities across the globe. Stantec trades on the TSX and the NYSE under the symbol STN.

### **Learn about all CCE Award winning projects**

In November, follow ACEC’s national and international award winning *#20DaysOfExcellence in Engineering* campaign on social media. Visit [www.acec.ca/awards/2021](http://www.acec.ca/awards/2021) to view videos of the winning projects and to learn more about the impact of consulting engineering on our quality of life.

### **About CCE Awards co-sponsors**

ACEC represents companies in Canada that provide professional engineering services to both public and private sector clients. These services include the planning, design and execution of all types of engineering projects, as well as providing independent advice and expertise in a wide range of engineering and engineering-related fields. For more information about ACEC and the 2021 Canadian Consulting Engineering Awards, please visit [www.acec.ca](http://www.acec.ca).

**Canadian Consulting Engineer** is a privately-owned magazine for professional engineers working as consultants in the construction field. It is published by Annex Business Media. This year's award-winning projects are described in full in the September/October 2021 issue of *Canadian Consulting Engineer* at [www.canadianconsultingengineer.com/digital-edition/](http://www.canadianconsultingengineer.com/digital-edition/).
